

Date: 07 July 2026	Team ID: SB-7429
Project Name: Smart Lender: Applicant Credibility Prediction for Loan Approval	Maximum Marks: 3 Marks

BRAINSTORMING & IDEA PRIORITIZATION TEMPLATE

Step 1: Brainstorm and Idea Listing

Each team member brainstorms and suggests distinct capabilities for the Smart Lender underwriting framework.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sanjay Raju Addala	Automated numeric missing value imputation via column means	Preprocessing	Group 1
2	Adapaka Pavanakumari	Mode imputation for categorical parameters (Married, Dependents, Credit History)	Preprocessing	Group 1
3	Suravarapu Sasivardhan	Benchmark multiple estimators (Decision Tree, RF, KNN, XGBoost) side-by-side	Modeling	Group 2
4	Junnu Veera Venkata Mani Shankar	Deploy final optimized XGBoost model into an interactive Flask server	Deployment	Group 3
5	Sanjay Raju Addala	Develop multi-tab UI styling to group evaluation form and EDA analytics	User Interface	Group 4
6	Tammana Charan Vijaya Venkata Bhaskar	Establish scenario-based risk triggers on results page	User Experience	Group 5

Step 2: Idea Prioritization

Evaluation of suggested groups on feasibility, utility, and prioritising development scope.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority Selected (Yes/No)
Group 1	Numerical Mean & Categorical Mode Imputations	High	High	Yes
Group 2	Multi-model Classifier Benchmarking	High	High	Yes
Group 3	Interactive Flask Web Server	High	High	Yes
Group 4	Multi-tab Dark Fintech Interface	High	High	Yes
Group 5	Scenario-based Risk Auditing Details	High	Medium	Yes
