Project Name: Smart Lender: Applicant Credibility Prediction for Loan Approval	Maximum Marks: 2 Marks

CUSTOMER JOURNEY MAP TEMPLATE

Customer Journey Map

Mapping the loan applicant's interaction with the Smart Lender automated underwriting portal.

Phase of Journey	Stage 1: Profile Form Submission	Stage 2: Feature Transformation	Stage 3: Decision Display
Actions What does the customer do?	The applicant accesses the web portal and keys in their income, dependents, property location, and loan details.	The Flask backend receives the payload, transforms categorical columns, and runs the XGBoost model.	The screen displays the APPROVED or REJECTED result alongside the probability breakdown and inputs.
Touchpoint What do they interact with?	Responsive multi-tab HTML5 input form (home.html).	Backend web controller (app.py) and serialized model binaries.	Stylized fintech decision panel (result.html).
Customer Thought What is the customer thinking?	'I hope I entered my monthly income correctly.' 'Is the form submission secure?'	'How long will it take to run?'	'The layout clearly shows my parameters. It was very fast.' 'I understand why it was rejected.'
Customer Feeling What is the customer feeling?	Optimistic, expecting instant verification.	Curious, hoping for a positive decision.	Relieved (if approved) or informed (if rejected).

Customer Journey Map (Continued)

Phase of Journey	Stage 1: Profile Form Submission	Stage 2: Feature Transformation	Stage 3: Decision Display
Process Ownership Who is in the lead?	UI/UX Developer / Frontend Engineer	Backend Developer / Data Scientist	Compliance Officer / Admin
Opportunities How can we improve?	Auto-fill inputs using verified databases where available.	Integrate local risk analysis models to provide real-time recommendations.	Add explanations detailing which variables influenced the rejection.
